

This to verify compliance with REACH regulations

We certify that during manufacturing of our products we do not use or intentionally add any of the chemicals restricted by current regulations and standards, including – but not restricted to – PFAS.

Products manufactured and placed on the market by SallingPlast fully comply with the European Union Regulation (EC) 1907/2006 concerning the Registration, Evaluation, Authorization and Restriction of Chemicals (REACH). According to the definition of the REACH regulations EC1907/2006, SallingPlast is a producer of “articles”. REACH requires article suppliers to inform recipients if an article contains a Substance of Very High Concern (SVHC) in excess of 0.1% by weight.

Based on the information provided to SallingPlast by approved suppliers, none of these substances are present in the materials SallingPlast uses in products, including packing and shipping materials. Thus, SallingPlast products do not contain any substances on the “[Candidate List of Substances of Very High Concern for authorization](#)” currently released by ECHA, European Chemicals Agency, in concentrations above the permitted limit.
